LEE CHIH PIN

Problem 1

Give the name of a programming language for each of the following:

- The first programming language to be used successfully for scientific applications.
- The first successful high-level programming language for business.
- The mostly used programming for developing AI applications (especially prior to 1990).

Solution

- The first programming language to be used successfully for scientific applications: **Fortran**
- The first successful high-level programming language for business: **COBOL**
- The mostly used programming for developing AI applications (especially prior to 1990): **LISP**
